

PERFORMANCE POWER

SOLUTIONS AT HYPERSCALE

Your agency for mission critical electrical infrastructure.

Serving Washington, Oregon, Alaska, Idaho, and Montana with these leading manufacturers:

Eaton Powerware Corporation is your total solution for protecting valuable data and equipment from power problems.

- Uninterruptible Power Supplies (350VA – 1.5MW)
- EV Level 3 Chargers
- ePDU's (Plug Strips)
- Power Management Software
- Emergency Lighting Inverters

PDI's collection of specialist technologies are uniquely positioned to provide power management solutions for mission critical data centers, electronic and communication networks.

- PDU's
- Busway
- RPP's
- STS
- Transformers
- BCMS

VoltServer Inc.'s patented Digital Electricity platform distributes electricity in a safe, digital format. The technology is simple to deploy, lower-cost, and resilient. VoltServer empowers organizations to pursue true digital transformation no matter the complexity or demands on their venue.

Trystar's full line of products safely connect portable generators and load banks to help protect from a possible power loss. Load Banks Direct is a leading manufacturer of high-capacity load banks.

Hitec's Rotary Diesel UPS is the perfect solution for data centers, airports, and hospitals requiring an IT Grade UPS. The DRUPS system comprises of a diesel engine, generator, kinetic energy module and coupling choke.

LEA Int'l manufactures the broadest line of SPD's in the industry. With equipment ranging from large series units with 450kA pre-phase surge current capability, to plug-in devices and office equipment.

Exertherm provides a patented technology designed to provide continuous 24x7 thermal monitoring of mission-critical electrical equipment such as key busbar terminations. Exergen Corporation has been pioneering the development of this revolutionary technology in partnership with QHi-Group.

Trilogy manufactures the HPDU and RPDU which are designed to provide an advanced, redundant, reliable, and cost-efficient way to distribute power to a row of data center racks.

Mirus Int'l Inc. specializes in the design, development, and manufacturing of power quality products for the mitigation of harmonics in medium to low voltage distribution systems.

USystems and its award-winning Data Center cooling systems offer great versatility, increased safety, real estate reduction, and cap-ex reduction, as well as an incredible reduction in power consumption.
